CAD PROJEKT K&A

We create software,
to turn your visions
into reality

Get to know us

We invite you into the fascinating world of interior design and architecture! We are the authors of a specialised yet intuitive interior design software with which you will do all the necessary work – from design, visualization, technical documentation to pricing.

CAD Decor PRO

The most extensive programme in our range. An excellent choice for experienced designers and interior architects. At the same time, its clear and intuitive interface means that it can also be used by people who are just beginning their adventure with design.

- CAD Decor PRO includes CAD Decor, CAD Kitchens, Cabinet Design and Edition Module and Render PRO **combined in an innovative way**

- **photorealistic** visualisations (Full HD, 4K), 64-bit CAD environment, films, animations, mobile Panorama 360, panorama and spherical animation

- insertion of 3D models in visualisation making changes and moving in the scene **during the calculations**

- product and universal **databases** and User Database

- the **ease** of handling light sources in visualisation

- wide selection of **materials** with built-in properties

COMPREHENSIVE

! CAD Decor PRO
can be extended with **CAD Cut**
and **Wardrobes Module**

Łukasz Cuprys & S.C
Pracownia Aranżacji Wnętrz

CAD Decor

Programme for interior design and visualisation with particular emphasis on the use of ceramic tiles in the design. It contains a unique module on the Polish market with management, editing and pricing of ceramic tiles and textures.

- product and universal **databases** for interior design, tiles and bathroom ceramics, as well as the User Database

- insertion of 3D models in visualisation, 64-bit CAD environment, working freely with wall and floor coverings: **drag-and-drop** application of textures, paints, ceramic tiles and grouts in any configuration

- practical **options for optimising used tiles** (tiles with unusual shapes, hexagons) and unique final visualisation effects (convexity, bump mapping)

- design of **residential and commercial interiors**, including: living rooms, bathrooms, bedrooms, offices

EFFECTIVE

! CAD Decor can be expanded with **Render PRO** and the **Wardrobe Module** or upgraded to **CAD Decor PRO**

YOU CAN DO IT ALL in CAD Decor

CREATE ANIMATIONS AND AVI FILMS

360 PANORAMA

CAD Kitchens is available in two versions:
CAD Kitchens Standard and CAD Kitchens MAX
(CAD Kitchens Standard + Cabinet Design
and Edition Module + CAD Cut 4.X)

Marta Cybulska – Pracownia Cybulska Design

CAD Kitchens

A design, visualisation, documentation and valuation tool aimed at manufacturers, carpenters and designers who create not only for individual orders.

- visualisations, animations and AVI films (standard renderings) **with professional evaluation**, reports and technical documentation

- 64-bit CAD environment, possibility to **insert household appliances** at any stage of design

- product and universal **databases** for interior elements, household appliances and kitchen cabinets as well as the User's Database

- advanced **self-generating elements**, e.g. free 3D modelling, typical and non-standard worktops and cornices, design of kitchen cabinets

- design of **residential and commercial interiors**, including: living rooms, bathrooms, bedrooms, offices

PRACTICAL

! CAD Kitchens can be expanded with **Render PRO**, the **Wardrobe Module** and **CAD Cut** or upgraded to **CAD Decor PRO**

YOU CAN DO IT ALL w CAD Kitchens

360 PANORAMA

Render PRO

A specialised, intuitive
and excellent visualisation tool.
Original module created to meet the needs
of architects and interior designers.

RES STUDIO
instagram.com/_res.studio

- rendering speed – striking effects
  achieved **in minutes** rather than hours

- huge final render **resolution**
  – up to 5760x3240

- unlimited number of lights
  – at the same time, to **speed up** calculations
  in a scene, our "intelligent" renderer
  uses only those that affect the scene

- help with framing the scene
  – a camera-like **grid** appears
  in the project preview

- Easy and instant change of the "climate"
  of a rendered interior
  – **colour tones** and ready-made filters

- wide **range of materials**
  with built-in properties

IMPRESSIVE

! Render PRO is an additional module
for **CAD Decor** and **CAD Kitchens**
and an integral part of **CAD Decor PRO**

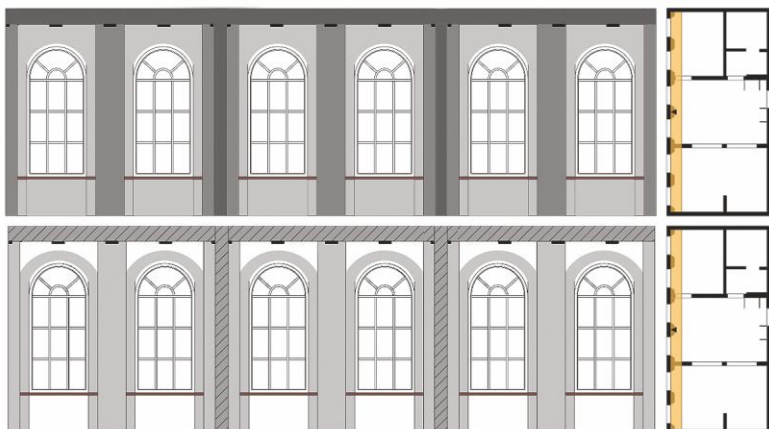

RES STUDIO
instagram.com/_res.studio

All of our programs have the ability to automatically generate professional project technical documentation.
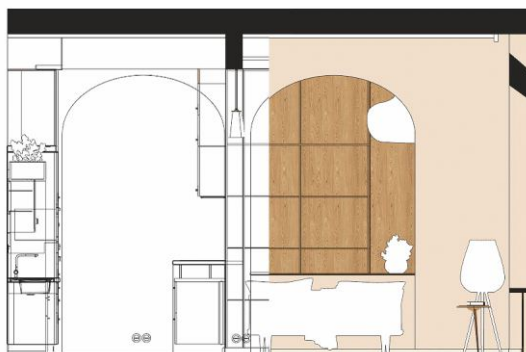

Technical documentation

Ready-made templates in the documentation - the perfect solution to save time.

Possibility to add your own **logo** to personalise the documentation.
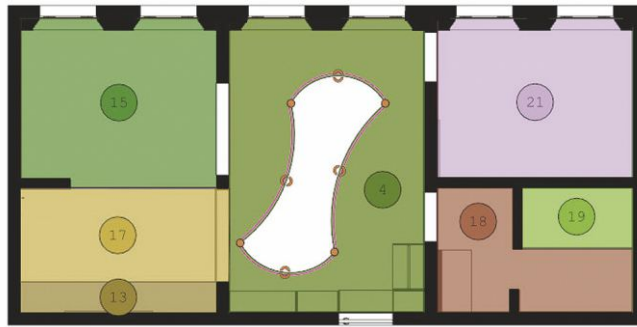

Personalisation of sections or wall projections - with just a few clicks, you can create different interior **colour variations** in your documentation.
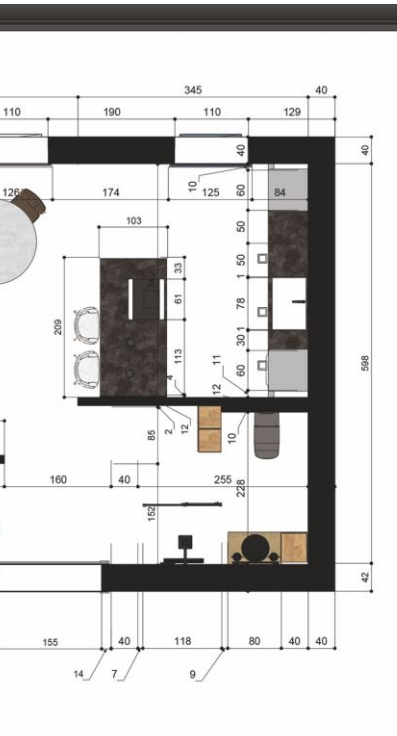

Possibility of **automatic generation of wall projections and textures** for the entire project.

Automatic creation **of floor lists** – including openings and edges of any shape, which can be edited using the pop-up menu. The program will add up all the surfaces by itself.

Tile list generation – presentation of the tile distribution by colours, textures or their outlines, together with a list of the tiles used.

Context menu – almost every element of the documentation can be moved to the top/bottom individually or in a group, without interfering with the project itself.

WORKING WITH DOCUMENTATION HAS NEVER BEEN SO EASY!

Edit wall projections and **sections freely** – with the option of hiding elements or simplifying their outlines. Make your design clear and easy to understand.

13

Material

In our programmes, you will find databases containing ready-made materials that you just need to apply to the objects in your project. A wide range of colours and textures will make your interiors a delight for your customers.

from inspiration to design

Do you want to change the parameters? No problem!

You can edit the materials to achieve the desired effect.

Bring your project to life with a wealth of colours and patterns

Which programme to choose?

Think about the interiors you want to design
and the features you care about most,
and see which software best meets your needs.

We support our customers

We are at your disposal both before and after the purchase.
Customer satisfaction is our top priority.
Check what else we have prepared for you.

TRAININGS

We conduct our trainings either **at the headquarters** of CAD Projekt K&A in Poznań or **online**. We offer training at the **basic** and **advanced,** as well as **thematic** ones. We train individually or in groups (max. 6 people). Participation can be financed by EU and state support programs.

Further information:
tel. +48 505 138 863
e-mail: szkolenia@cadprojekt.com.pl

SERVICE PACKAGE

the free package is valid for a period of **12 months from the date of purchase** of the software! Provides software updates, technical support and access to all new universal databases. Technical support via telephone, email and remotely.

Further information:
tel. +48 61 662 38 83
e-mail: pomoc@cadprojekt.com.pl

TEMPORARY KEYS

Not familiar with our software for architects? You don't have to decide to buy them right away. We offer a simple and attractive solution which gives you the opportunity to work on the **full version** of our software for a limited time. This gives you the opportunity to familiarise yourself with professional interior design software.

BANK OF 3D MODELS

A catalogue of 3D models on our website, developed on an ongoing basis by the users of our programs. Just upload a photo of the object you are interested in and vote! Objects with more than 100 votes will be drawn and made available for download, and in the future will be added to our universal databases.

Databases

We work with the best companies
that share a passion for creating INTERIOR!

A product base

is a precise investment. The measure
of good advertising is its effectiveness
translated into profits for the company.
For this to happen, information
about products and novelties
must reach the right audience.

BENEFITS FROM REALIZATION OF THE BASE

The most effective advertising on the market,
which only reaches interested recipients.

DATABASES

3D Models, Textures, Ceramic Tiles, Kitchen,
Appliances Manufacturers, doors and windows

Join us and create a product
database for architects with us!

Ask a salesman for details or check on www.en.cadprojekt.com.pl

They trusted us

Currently in our offer you will find databases created in accordance
with the current offer of producers of ceramic tiles, interior furnishings, furniture,
household appliances, bathroom ceramics and many others.
