

Texture database

VOLUME 1

COLLECTION OF TEXTURES

Collection of Textures vol. 1

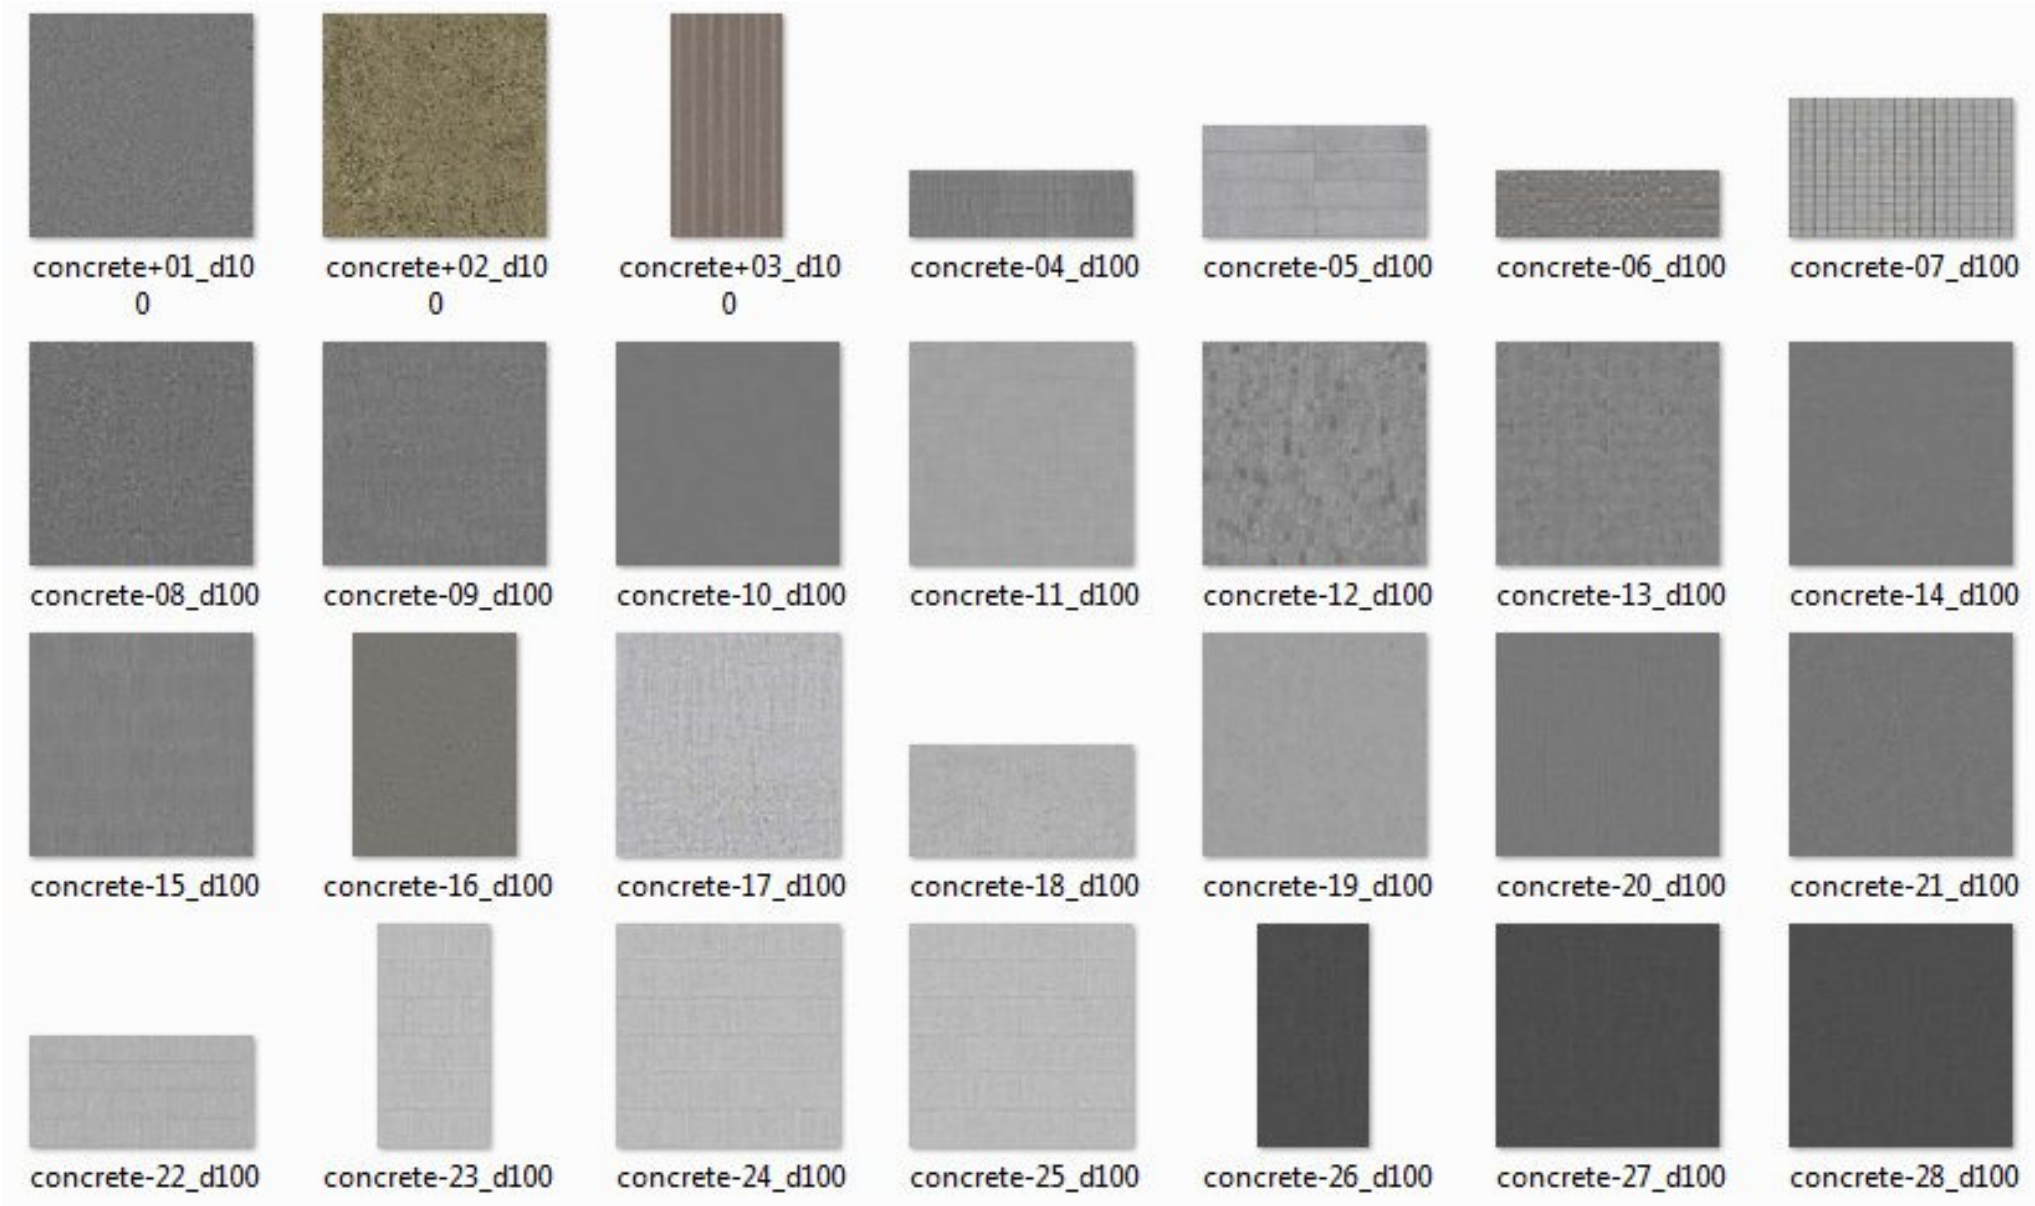

The new database 'Collection of textures vol. 1' is divided into 6 categories: concrete, brick, wood, stone, metal and other coverings. The database contains about 680 elements. The largest collections are stone and wood.

We are pleased to present you textures in a very good resolution. Many of them are available in very big sizes (at least one side is 1 meter long). What it more, some are provided in three various formats, so they can be applied on small surfaces, such as plinths, as well as on entire walls in the arranged interior.
