

Training program

CAD Decor PRO

HOW LONG THE TRAINING LASTS

3 days (18 hours / 6 hours each day)

WHERE IT IS HELD

stationary in Poznan or live **online**

The aim of the training is to acquire knowledge and skills in working with CAD Decor PRO software, including the creation of residential and commercial interior designs, the ability to professionally present a design, and the preparation of technical documentation with photorealistic visualizations of the designed interiors. Upon completion of the training, participants will receive a **personalized certificate** confirming their acquired skills.

ISSUES YOU WILL LEARN ABOUT

DAY 1

BASICS OF DESIGNING IN THE CAD DECOR PRO ENVIRONMENT, BATHROOM ARRANGEMENT

- introductory issues and preparing the group for training,
- basic information about the program,
- discussion of the project selection window functions,
- analysis of the interior design on which the training will be based,
- creating a bathroom design file,
- drawing a sketch of the room using the "Wall Creator" tool,
- discussion of the "Doors and Windows" tool,
- adding wall elements: windows and doors, basic slopes, and accessories,
- navigating the project, working with views,
- drawing two-dimensional shapes using drawing tools,
- creating non-standard objects using the "Freeform Elements" tool,
- moving and copying objects in three dimensions,
- visualization – general information,
- inserting furnishings from 2D and 3D levels,
- interior design elements – discussion of database archiving options,
- tiles – filtering tiles, discussion of the tool,
- applying ceramic tiles using the "Tiles" bar,
- creating a projection, recess, and embedding a mirror in tiles,
- adding your own tiles using the "Tile Editor,"
- tile layouts – rules for creating modular systems,
- using the paint module,
- applying textures and standard materials,
- exercises – working with a project.

DAY 2

CAD DECOR PRO – INTERIOR DESIGN, KITCHEN DESIGN

- analysis of the interior design on which the training will be based,
- creating a kitchen design file,
- drawing a design sketch and converting the sketch into walls,
- adding wall elements: doors and windows,
- techniques for inserting cabinets,
- editing cabinet parameters,
- generating and editing typical countertops,
- creating countertops with unusual shapes,
- using the columns/walls tool,
- inserting household appliances into the design,
- molding base editor, adding a profile to the user base,
- arranging finishing moldings along a drawn path,
- creating cabinets with unusual dimensions using the Cabinet Editor,
- replacing kitchen furniture sets,
- visualization - using kitchen base colors,
- applying textures and standard materials,
- adding 3D models to the project,
- adding models to the user database using the “Converter” tool,
- merging user databases,
- exercises - working with the project.

DAY 3

CAD DECOR PRO – OVERVIEW – RENDERING AND VISUALIZATION OF THE PROJECT – PATH TRACING – DOCUMENTATION OF THE COMPLETED PROJECT

- discussion of the “Overview” tool, editing lists, preparing to link to documentation,
- visualization – discussion of material properties,
- light in the project – settings and properties,
 - halogens
 - spotlight
 - sunlight
 - emissive surfaces
 - backlights
- Path tracing rendering – overview of module functions,
- scene framing,
- camera angle application,
- discussion of color tone application,
- creation of photorealistic visualization, saving photos after path tracing calculations,
- creation of visualization using depth of field,
- saving visualization of several views simultaneously,
- documentation – discussion of the functionality of pages used in the project,
- adding layouts and cross-sections to generated pages,
- saving documentation and exporting to PDF,
- checking messages, own questions.
