Training
Technical Documentation

HOW LONG THE TRAINING LASTS
2 hours

WHERE IT IS HELD
live **online**

WHAT YOU WILL LEARN

During the training you will learn how to create professional technical documentation. We know how important it is to practice, that's why at our training courses you will work and learn on a specific project, so you can easily apply the acquired knowledge in your work. At the end you will receive a **personal certificate**, confirming the skills you have acquired.

ISSUES YOU WILL LEARN ABOUT

- analysis of the interior design, on the basis of which the training will be carried out
- linking the documentation to the visualization
- discussion of the documentation window
- generating documentation according to available templates
- adding own templates
- discussion of the functionality of individual pages
- editing documentation content, adding/subtracting pages
- copying content between pages
- adding layouts and sections to generated pages
- adding your own symbols
- dimensioning
- building a page - summary drawing
- creating and editing tables
- saving documentation and exporting to PDF
