

Training program

For start

CAD Decor PRO, CAD Decor, CAD Kitchens

WHERE IT IS HELD

aCADemy training platform CAD Projekt K&A

The aim of the training is to acquire knowledge and skills in the basic use of tools necessary for the work of a designer. During the classes, participants will gain practical knowledge that will allow them to navigate our programs with ease. The training is ideal for both those who have not yet had any contact with the software and those who want to refresh their skills. After completing the training on the platform, participants generate a **personalized certificate** confirming the skills they have acquired*.

For those seeking more advanced knowledge, we have prepared dedicated training courses, in which we discuss the individual functions and modules of the programs in detail and in practice.

ISSUES YOU WILL LEARN ABOUT

- Basic information about the program.
- Analysis of the design of the interior where the training will be carried out.
- Creation of the project file.
- Drawing a sample room based on the Wall Wizard.
- Discussion of the program's interface, moving around the project, working with views.
- Discussion and introduction of wall elements: doors and windows.
- Discussion of basic drawing functions and pull points.
- Room arrangement.
- Inserting interior elements from the 2D level.
- Drawing freeform elements using path and "Freeform elements" tools.
- Visualization - general information.
- Applying textures and standard materials.
- Basic setting of lighting parameters.
- Execution of basic visualization with saving the effect in jpg format.
- Technical documentation of the project, basic information.
- Overview, basic information.
