Training program
Render PRO

HOW LONG THE TRAINING LASTS
1 day (4 hours)

WHERE IT IS HELD
stationary in Poznan or live **online**

WHAT YOU WILL LEARN

During the training you will learn how to create realistic visualizations. We know how important it is to practice, that's why during our trainings you will work and learn on a specific project, so you can easily apply the acquired knowledge in your work. At the end you will receive a **personal certificate**, confirming the skills you have acquired.

ISSUES YOU WILL LEARN ABOUT

- analysis of the interior design, on the basis of which the training will be carried out
- properties of materials - discussion of settings
- saving materials to the user base
- light in the project - settings and properties
  - halogens
  - spot light
  - sunlight
  - emission surfaces
  - backlights
- Path tracing rendering - discussion of the module functions
- scene framing
- use of camera angle
- discussion of the use of color tones
- performing photorealistic visualization, saving images after Path tracing calculations
- making a record of visualization of several views simultaneously
- making a spherical photo
- performing visualization with the use of depth of field
- discussion of the function and how to save the project as an AVI movie
- checking of knowledge, own questions
